PPGCC – Graduate Program in Climate Sciences
Natal, RN , Brazil

Dear Prof. Hoelzemann

Considering the urgent need to act proactively on climate change and environmental issues, the Foundation for Research Support of the State of Rio Grande do Norte – FAPERN is aware of the importance of studies and discussions by the International Global Atmospheric Chemistry project (IGAC) and the International Commission on Atmospheric Chemistry and Global Pollution (iCACGP).

Therefore, we believe that the joint conference and symposium of these organizations are of great importance not only for Brazilian society, but also for the entire scientific community, especially chemists, meteorologists, environmentalists, planners, doctors and other professionals interested in this issue.

Thus we expect that your proposal will be accepted by the committee leaders. In addition, we can assure you that FAPERN will do everything in its power to promote the participation of the scientific community of the state and, to that end we are working towards providing the physical space needed for the event.

Best wishes

Maria Bernardete Cordeiro de Sousa
President of FAPERN
