PROGRAMA DE PÓS-GRADUAÇÃO EM CIÊNCIAS CLIMÁTICAS

September 19, 2011.

To
Dr. Judith Johanna Hoelzemann
IGAC/iCACGP 2014 Local Organizing Committee
Escola de Ciências e Tecnologia
Universidade Federal do Rio Grande do Norte

Dear Dr. Hoelzemann

The Coordinators of the Graduate Study Program in Climate Sciences (PPGCC in Portuguese), of the Federal University of Rio Grande do Norte in Natal, Brazil, are very happy to hear about the bidding proposal to the Joint Conference and Symposium promoted by the International Global Atmospheric Chemistry (IGAC) and the international Commission on Atmospheric Chemistry and Global Pollution (iCACGP).

The realization of the event in Natal is of fundamental importance to the scientific development in our region. Firstly, it will highlight our recently created Graduate Study Program in Climate Sciences (founded in 2010), since the conference will be an excellent platform to expose the program to the national and international scientific community. In addition, we have enormous interest in the scientific discussions and outcome that will arise from the event. We are most confident that they will highly contribute to our ongoing activities in the field of Atmospheric Chemistry and Air Quality.

We also are and will be engaged in establishing contacts and in leading communication with key institutions, funding agencies and national companies (for example Vale and Petrobrás) that traditionally provide financial support to scientific events.

Therefore, we hope your proposal will be accepted by the chief committees. In order to have a very successful event we will provide you with all assistance within our reaches. Please be assured that our colleagues and students will provide any assistance needed by IGAC and iCACGP and the Local Organizing Committee with their best efforts.

Sincerely Yours,

Dr. Francisco Alexandre da Costa
Head to PPGCC
