LETTER OF SUPPORT

The Regional Office of the International Geosphere-Biosphere Program (IGBP) in Brazil is very pleased to express its support to your plans to bring the International Global Atmospheric Chemistry (IGAC) Conference and the International Commission on Atmospheric Chemistry and Global Pollution (iCACGP) Symposium to Brazil in 2014.

The IGAC conferences have, over the years, been an outstanding forum for science discussions and presentations of relevant results covering several areas of the atmospheric science community and other related fields. The Regional Office over the past few years have been actively supporting the participation of young and senior scholars from developing countries to IGBP programmes and projects conferences, like the IGAC. Our motivation to support the IGAC 2014 conference in Brazil, will be an expressive opportunity for the engagement of both South America and other developing countries scholars in this major Global Atmospheric Chemistry Conference.

We gladly support this initiative and look forward to a successful conference.

A handwritten signature in blue ink, appearing to read "Patricia Pinho", written over a horizontal line.

(Patricia Pinho, PhD – IGBP Regional Office,
Science Officer at Center for Earth System Science, INPE)
